Dear Sir/Madam,

Application for Joining the AirAsia Hackathon, AirVolution 2017

As stated above, I would like to participate in the first ever AirAsia hackathon, AirVolution 2017. Currently, I am a final year computer science student at University Malaysia of Computer Science & Engineering (UniMy).

For your information, I am currently developing my final year project as part of my course. Hence, through this competition, I can apply my methodology and practice what I have learnt in this event. I would also able to gain new knowledge in the same niche by meeting other participants for changing ideas and solutions.

As technology grows, it is a beautiful efforts from AirAsia in organizing this event to shift the airlines business into digital airlines. Hence, it would be my honor if my application is considered so that I can contribute something.

Finally, thank you for your time in reading my letter. I am looking forward for your response.

Sincerely,

Mohamed Nor Faiz Bin Shahudin

OBJECTIVE

I'm applying to join the AirAsia first hackathon, AirVolution 2017.

EDUCATION

Bachelor of Computer Science   Expected Dec 2017

University Malaysia of Computer Science & Engineering

- Related course work: Information Assurance & Security, Certified Ethical Hacking, and Network+

Foundation in Computing & Engineering   2013-2014

University Malaysia of Computer Science & Engineering

- CGPA: 3.61

Sijil Pelajaran Malaysia (SPM)   2011-2012

Sekolah Menengah Sains Muar

- Grade: 7A+ 2A

SKILLS & ABILITIES

- Works as project manager of mini software project.
- Proficient in C, Java, Prolog, Haskell Programming Language.
- Shortlisted for 100 in Digi's Challenge For Change Mobile Apps Competition 2013.
- Has fast-typing with average 70 WPM.
- Certified Ethical Hacker by EC-Council.

EXPERIENCE

President of Student Representative Council   2014to 2015

University Malaysia of Computer Science & Engineering

- Start up a fresh student body
- Generate ideas to improve student experience
- Consult members to handle their portfolios
- Organize events
